All information in this brochure is subject to change without notice. Printmark is not liable for any errors or omissions.

1- Average standard page yield value declared in accordance with ISO/IEC 19752. 2- "Recommended Monthly Page Volume" is a range of pages that helps customers evaluate Printmark's product offerings based on the average number of pages customers plan to print on the device each month. Printmark recommends that the number of pages per month be within the stated range for optimum device performance, based on factors including supplies replacement intervals, paper loading intervals, speed, and typical customer usage. 3- "Maximum Monthly Duty Cycle" is defined as the maximum number of pages a device could deliver in a month using a multishift operation. This metric provides a comparison of robustness in relation to other Printmark printers and MFPs. 4- Printers are sold subject to certain license/agreement conditions. 5- Actual Yield may vary based on other factors such as device speed, paper size and feed orientation, toner coverage, tray source, percentage of black-only printing and average print job complexity. 6- Print and copy speeds measured in accordance with ISO/IEC 24734 and ISO/IEC 24735 respectively.
